

Corrections

Chapter 12, Paragraph 475, read:

(475) The only bridge crossing Route 2 is at **Mile 60.7**. State Route 717 highway bridge, connecting the mainland at **Belle Glade** with **Torry Island** and **Kreamer Island**, has a swing span with a clearance of 11 feet. The channel is through the west draw. (See **33 CFR 117.1** through **117.59** and **117.317**, chapter 2, for drawbridge regulations.) An overhead power cable at the bridge has a reported clearance of 52 feet. Gasoline, water, ice, electricity, diesel fuel by truck and launching ramps are available at boat landings on both sides of the bridge. South of the bridge, on Torry Island, there is a wharf maintained by the city with depths of 4 feet alongside; there are three surfaced launching ramps and a public picnic area.
